1 | EXECUTIVE SUMMARY

Organizational Overview & Service Capability

Landscapers INC is a Durban-based, fully registered and insured landscaping contractor specializing in structured grounds maintenance for residential estates, townhouse complexes, and sectional title developments throughout Durban and surrounding areas.

We provide comprehensive landscape management solutions designed to enhance property presentation, protect asset value, and maintain safe, well-managed outdoor environments. Our operational model is built around scheduled service delivery, site supervision, and measurable maintenance standards to ensure consistent results across all properties under our care.

Landscapers INC carries Public Liability Insurance cover of R1,000,000, offering Homeowners Associations, trustees, and managing agents reduced risk exposure and peace of mind. Compliance, safety, and accountability form the foundation of our service delivery framework.

Core Service Portfolio

Service Category	Description
Lawn Maintenance	Scheduled cutting & precision edging
Hedge Management	Formal shaping & structured trimming
Tree Services	Pruning & controlled felling
Storm Response	Emergency clearing services
Estate Clean-Ups	Garden rejuvenation
Irrigation	Inspection & minor maintenance
Weed Control	Common-area vegetation management/Weed treatment

Operating within Durban's coastal climate, we understand the accelerated vegetation growth, seasonal rainfall patterns, and storm-related risks typical of KwaZulu-Natal. Our maintenance programs are structured to accommodate these environmental factors, ensuring estates remain consistently neat, compliant, and professionally maintained throughout the year.

Our Service Principles

- Reliable, scheduled maintenance
- On-site supervision and quality control
- Uniformed and trained staff
- Strict adherence to health and safety standards
- Transparent pricing and contract structures
- Clear communication with trustees and managing agents

Landscapers INC is committed to establishing long-term partnerships with residential communities by delivering structured, predictable, and high-quality landscaping services that uphold property standards and enhance overall estate presentation.

2 | COMPANY PROFILE

Organizational Capability & Service Framework

About Landscapers INC

Landscapers INC is a Professional Landscaping & Outdoor Maintenance company dedicated to transforming outdoor spaces into vibrant, functional, and sustainable environments. With a commitment to quality, safety, and customer satisfaction, we offer a complete range of landscaping services for residential, commercial, and industrial properties. Our skilled team combines technical expertise with creative design to ensure every project enhances both beauty and value.

Corporate Mission

! At Landscapers Inc, our mission is to create sustainable, vibrant, and functional outdoor spaces that harmonize beauty with environmental responsibility. We aim to transform every

landscape into a living masterpiece that enhances property value, supports ecological balance, and brings joy to our clients.

Service Divisions

G Grounds Maintenance Division

Grass Cutting (Mowing): We provide professional lawn mowing services designed to keep your grass healthy and neatly trimmed. Our team follows the "one-third rule"—cutting only the top third of the grass—to maintain lush, dense, and stress-free lawns. Regular mowing promotes vibrant growth and a well-kept appearance for your property.

A Arboricultural Services

Tree Felling: Tree felling is performed safely and efficiently by our skilled professionals using specialized equipment and methods. We ensure that trees are removed in a controlled manner to avoid property damage and personal injury, following all safety and environmental standards.

Pruning: Our pruning services focus on the health, shape, and growth of your plants and trees. We selectively remove dead, diseased, or overgrown branches to enhance structure, encourage new growth, and allow more sunlight and airflow—resulting in stronger and more attractive plants.

H Hardscaping & Structural Enhancements

Hardscaping: Our hardscaping services include patios, walkways, driveways, retaining walls, fire pits, and more. Using durable materials such as stone, brick, and wood, we create lasting structures that enhance functionality and complement the natural landscape design.

Rock Installation: Rock installations add both beauty and functionality to outdoor spaces. We design and install decorative and structural rock features that improve drainage, prevent erosion, and provide a natural, low-maintenance finish to gardens and outdoor areas.

E Environmental & Compliance Services

Soil Turning (Tilling): We offer expert soil turning and tilling to aerate, loosen, and revitalize soil. This process prepares the ground for planting and improves water absorption, root development, and soil health—setting the foundation for thriving landscapes.

Plant Installation: We handle plant installation from start to finish—from soil preparation to proper placement and post-installation care. Our team ensures each plant is positioned for optimal growth conditions, contributing to the landscape's long-term health and aesthetic appeal.

Alien Plant Removal: We specialize in the removal and management of invasive alien plant species. Through manual, mechanical, and environmentally responsible chemical methods, we restore ecological balance by replacing alien plants with indigenous alternatives as recommended by environmental authorities.

Hedging: Hedging services provide structured living boundaries that enhance privacy, define property lines, and add greenery to your landscape. We design and maintain hedges that are both attractive and functional, tailored to your property's layout and aesthetic goals.

Roof & Gutter Cleaning: Roof and gutter cleaning is the maintenance process of removing dirt, leaves, debris, and blockages from your roof surface and gutter system to ensure proper water drainage and protect your home from damage.

Rubble Removal: Rubble removal is the process of collecting, transporting, and properly disposing of debris and waste materials generated from construction, renovation, or demolition activities. It ensures sites remain safe, clean, and compliant with environmental regulations.

Services Offered Tailored to Estates and Complexes

Routine Grounds Maintenance

- Scheduled grass cutting
- Precision edging of pavements and curbs
- Weed control in common areas
- Hedge trimming and shaping
- Garden bed maintenance

3 | METHOD STATEMENT

Operational Execution & Quality Control Framework

This document outlines the formal operational methodology, safety compliance measures, and quality assurance procedures adopted by Landscapers INC.

Scope: Landscape & Grounds Maintenance

P Purpose

This Method Statement outlines the procedures and standards followed by Landscapers INC in the maintenance of landscaped areas within estates, office parks, and commercial properties to ensure a neat, safe, and aesthetically pleasing environment.

S Scope of Work

The services include:

- ☐ Lawn mowing and edging
- ☐ Hedge trimming and shaping
- ☐ Tree pruning (non-specialist height)
- ☐ Garden bed maintenance
- ☐ Weed control
- ☐ Leaf clearing and debris removal
- ☐ Irrigation system inspection (visual)
- ☐ Fertilizing and seasonal treatment
- ☐ Pressure cleaning
- ☐ Refuse removal

Work Schedule & Frequency

- ♦ Weekly (standard estates)//Bi – Weekly (Office parks)
- ♦ Seasonal adjustments during high-growth periods

Work is conducted during approved estate working hours to minimize disturbance.

Operational Procedure

A. Site Arrival & Preparation

- ◆ Staff report to Site Supervisor
- ◆ PPE inspection conducted
- ◆ Equipment checked using pre-use checklist
- ◆ Work zones identified
- ◆ Safety signage placed if necessary

B. Lawn Maintenance Procedure

1. Remove visible debris from lawn area
2. Mow grass using commercial lawnmowers at recommended height
3. Edge sidewalks, curbs, and beds using brush cutters
4. Blow clippings off hard surfaces
5. Collect and remove excess grass clippings if required

Grass cutting follows the "one-third rule" to prevent turf stress.

C. Hedge & Shrub Maintenance

1. Inspect plant health
2. Trim hedges to uniform height and shape
3. Remove dead or diseased branches
4. Collect and dispose of trimmings
5. Clean surrounding areas

D. Garden Bed Maintenance

- ◆ Remove weeds manually or mechanically
- ◆ Loosen soil to improve aeration
- ◆ Apply mulch where required

- ♦ Apply fertilizer as per seasonal schedule
- ♦ Replace dead plants where approved

E. Tree Maintenance

- ♦ Prune small to medium trees (within safe working height)
- ♦ Remove deadwood
- ♦ Shape canopy for aesthetic balance
- ♦ Specialist high-risk tree work

F. Irrigation Inspection

- ♦ Visual inspection of sprinkler heads
- ♦ Report leaks, blockages, or damage
- ♦ Minor adjustments made where possible
- ♦ Major repairs quoted separately

G. Waste Management

- ♦ All green waste collected
- ♦ Loaded into trailer
- ♦ Disposed at approved municipal sites
- ♦ No dumping on estate premises

4 | HEALTH, SAFETY & RISK MANAGEMENT COMPLIANCE

- ♦ PPE always worn
- ♦ Only trained staff operate machinery
- ♦ Noise kept within acceptable levels
- ♦ Fuel stored safely
- ♦ Equipment switched off during maintenance
- ♦ Hazard areas secured

A site-specific risk assessment is conducted prior to contract commencement.

Q Quality Control

- ♦ Supervisor conducts daily inspections
- ♦ Operations Manager conducts periodic audits
- ♦ Client walkthrough available upon request
- ♦ Corrective action taken within 24-48 hours if required

E Environmental Responsibility

- ♦ Minimal chemical use
- ♦ Controlled fertilizer application
- ♦ No contamination of stormwater drains
- ♦ Water conservation practices encouraged

C Communication & Reporting

- ♦ Monthly service report (if required)
- ♦ Immediate reporting of hazards or irrigation faults
- ♦ Clear communication channel with estate management

Commitment: Landscapers INC is committed to maintaining landscaped areas to a consistently high standard, ensuring safety, reliability, and professional service delivery at all times.
