Our relationships with the local communities we serve are therefore very important to us and are an essential part in the growth of our business. When developing our services, we have a role to play in improving services for the community as a whole and not just our individual customers.

Our policy is to strive to achieve continual improvement in environmental performance.

We are committed to:

- preventing pollution and reducing the overall impact of our operations on the environment.
- maintaining an internal management structure for the management of environmental issues which includes clearly defined responsibilities for environmental management capable of delivering this policy commitment

Climate change has now been recognised as an international issue with national governments on both sides of the Atlantic committed to taking action to reduce greenhouse emissions. As a major transport operator, we recognise that we emit greenhouse gases from operating our vehicle fleet. At the same time, we have a role in supporting government and communities to reduce the impacts of climate change from road transport.

We are committed to reducing the greenhouse gas emissions from our operations in a way which supports national government strategies and in line with our commitment to our customers, provide safe, efficient and reliable services.

All businesses affect biodiversity through the use of resources and discharge of waste products. This Biodiversity Policy is therefore consistent with our broader Environmental Policy, which includes a stated commitment to minimise the environmental impacts of our operations and prevent pollution.

Our policy is to strive to enhance biodiversity where practicable.

Accordingly, our commitments are:

- Where we operate from sites which are designated as being of importance due to their natural habitats, we will work with the relevant authorities and affected parties to ensure protection of these habitats through effective pollution control measures and management plans with the aim of conserving or enhancing the biodiversity of these sites.
- Where we are involved in the development of new sites, we will comply with all relevant statutory requirements and guidelines in respect of designated areas on any of our development sites.

- Where significant areas of landscaping are proposed, we will aim to promote biodiversity through, for example, sensitivity of planting taking account of any local biodiversity networks or action plans.
- Where we operate from existing sites the potential to promote biodiversity is likely to be limited. The nature of the operations conducted at our sites is such that they are largely covered in hard standing.
- We will however seek to identify any sites where the potential exists for enhancing biodiversity and over time develop appropriate actions plans to achieve this.
- Where we consider it appropriate to do so, we will support the implementation of the SA Biodiversity Action Plan and Local Biodiversity Action Plans defining areas which require special protection and management to ensure that biodiversity is maintained. We will seek to do this in partnership with the relevant authorities and affected parties, who promote biodiversity on a local and national level and seek to identify ways in which we may be able to support the development of selected schemes or initiatives.
