

Purpose

The purpose of this policy is to ensure that employees are aware of the rules and regulations to be followed whilst using company and personal cell phones during working hours.

Scope

This policy applies to all employees at Landscapers INC.

Policy Guidelines

The following are Landscapers INC guidelines for proper employee cell phone use during working hours. In general, cell phones should not be used when they could pose a security or safety risk, or when they distract from work tasks.

- Cell phone use by drivers is strictly prohibited while the vehicle is in motion. Drivers should stop their vehicle in a safe location off the road and away from traffic to engage in information taking. If it is not possible to pull over to the side of the road due to safety related issues, then the driver's assistant (if and where applicable) must engage in information taking.
- Cell phone use is not the only factor that can increase the safety risk of operating a motor vehicle. Drivers are also discouraged from other forms of "multi-tasking" (e.g. eating, reading, texting, taking notes), as these all impair the driver's ability to operate the vehicle safely. Proper sleep and alertness are also a prerequisite to safe driving, so only drive when physically capable of doing so safely.
- Never use a cell phone whilst operating any machine handling equipment.
- Employees are not allowed to play games, be on social media etc. on the mobile phones during working hours with the exception during your tea and lunch breaks.
- Use of earphones and headphones are strictly prohibited during working hours.
- The use of camera, video recording or audio recording on company premises and during working hours is strictly prohibited without the express prior permission from Senior Management and of the person/s subject to recording.

- Landscapers INC understands that there are exceptions at the discretions of Management.
- Cell phones should be turned off or set on silent mode or vibrate mode during meetings or in any circumstance where incoming calls may be disruptive.
- Landscapers INC does not hold any responsibility for the loss of personal devices brought to the workplace.
- The company prohibits the use of mobile phones in any area where using a mobile phone would be unsafe and would be distracting for the user or may create an unsafe working environment.
- Disciplinary measures will be implemented should fail to follow the above.
- This guideline supports the zero-incident culture we aim to achieve in our quest for world class Operational Excellence. We are committed to the safety of our colleagues.
