

Drug and Alcohol Policy

Purpose

Landscapers INC recognises that an employee's state of health may affect his/her ability to perform his/her job, may restrict the kind of work he/she can perform and may affect his/her future employability. **Landscapers INC** also recognises that alcohol and drug abuse rank as major health problems worldwide. This statement of policy is to inform employees of **Landscapers INC**' viewpoint on physical or behavioural disorders resulting from use of drugs or alcohol, to encourage an enlightened attitude towards these disorders and to provide guidelines for consistent handling, throughout **Landscapers INC**, of problems resulting from alcohol and drug use.

Landscapers INC has a **ZERO tolerance** to Drugs and Alcohol

This policy applies to all staff of **Landscapers INC**.

Policy

Landscapers INC will give the same consideration to employees with dependencies on alcohol and/or drugs as it does to employees having any other disease. **Landscapers INC** is concerned only with those situations where the use of alcohol or drugs interferes with the employee's health, safety or job performance, adversely affects the job performance of other employees or is considered to be so serious as to be detrimental to **Landscapers INC**' business. **Landscapers INC** will not intrude in the private lives of employees.

In order to achieve successful treatment and rehabilitation and a return to productive employment with minimal disruption to personal, family and social life, it is most important that problems due to dependencies on alcohol and/or drugs are recognised early. **Landscapers INC** will assist an employee to obtain effective treatment and an employee who conscientiously seeks such help, will not place his or her job in jeopardy by doing so. The normal Company benefits that apply to any illness will be available to such an employee. The HR Department will assist in arranging treatment, and necessary absence from work will be regarded as sick leave or unpaid.

Legal Drugs

An employee may have legal access to drugs that might impair his/her work performance or create a risk of accidents. These would include alcohol and some drugs prescribed for an employee by a doctor. The employee is requested to advise the Supervisor or Line Manager if they are on prescribed drugs that may impair their work performance. An employee is prohibited from work whilst they affect his or her work performance. Where prescribed drugs cause impairment, it is in the best interests of the employee, his/her colleagues and **Landscapers INC** that he/she be given sick leave.

Illegal Drugs

For the purpose of this policy, illegal drugs are those drugs that cannot be obtained by legal means or drugs which are legally obtainable but which have been obtained by illegal means. This includes all forms of narcotics, stimulants, tranquillisers and hallucinogens whose sale, purchase, transfer, use or possession is prohibited or restricted. Employees are prohibited from being on or arriving at **Landscapers INC** premises OR client sites whilst under the effects of such drugs.

Screening

All prospective employees are medically examined before being accepted for permanent employment. All pre-employment medicals include testing for drug residues and evidence of alcohol abuse. These measures have been introduced to screen out prospective employees with drug or alcohol dependency problems. As per Occupational Health and Safety Act No 85 of 1993 Regulation 2a(1),(2),(3) Employees, and particularly those working in high-risk jobs, may be required from time to time to submit to a random urine drug screen. Such a procedure will form an integral part of accident or "near-miss" investigations and may be requested by Management or the HR Department in situations that give cause for concern.
